ABSTRACT

The public listed companies in Bursa Malaysia need to remain sustainable and act in responsible manner towards building effective economic, environment and social stability. Some of the challenges that the listed companies need to deal with due to events such as Covid 19 health crisis, climate change and social problems. However, an effective regulatory measures and approach can assist the companies to sustain in the market and continue to be in operation without compromising their responsibility towards environment and society. The shariah ruling do provide requirements that go beyond the rules set by regulators that could provide additional measure for companies to comply with.

In Malaysia, the Islamic equity market offer investment opportunity to investors, specifically, Muslim investors to invest in Islamic equity market. Muslim investors are required to ensure that the investment is aligned with the shariah requirements and avoid any elements prohibited by the Shariah ruling. The proceed comes from any prohibited elements may cause the Muslims investors failed in their act to abide with shariah ruling and may lead to destruction in economic, environment and society.
